

Bring CUAHSI to your campus

Free seminars, workshops, curriculum conversations, and consultations for universities, colleges, and research institutions — in person or virtual, tailored to your audience.

About CUAHSI: The Consortium of Universities for the Advancement of Hydrologic Science (CUAHSI) is a 501(c)3 research organization representing 130+ universities, backed by NSF. We operate HydroShare, deliver training programs, and develop shared cyberinfrastructure that advances water science at every career stage — all available to the broader community.

MENU OF ENGAGEMENT OPTIONS

Introduction to CUAHSI

1 hour

Overview of HydroShare, training programs, fellowships, and how to get involved. Tailored to undergrads, grad students, or faculty.

Works well for: Department seminars · New grad orientation · Faculty meetings · Virtual

Water data tools workshop

1–2 hours

Hands-on: find data, upload datasets, and run analyses in HydroShare and JupyterHub. Ideal for courses or research groups starting a project.

Works well for: Graduate courses · Research lab groups · In-person or virtual

FAIR data practices and reproducible workflows

2–3 hours

Data management planning, FAIR and CARE principles, and reproducible workflow design. Built for researchers preparing to publish data or meet NSF public access requirements.

Works well for: Advanced grad students · Postdocs · Research groups

Integrating CUAHSI learning resources into your curriculum

1–2 hours

A conversation for faculty and department leadership about adopting CUAHSI tools in courses: how CVU works and how students earn home-institution credit; using HydroLearn modules in hydrology and water resources courses; hosting or drawing on the Water Content Portal; and setting up JupyterHub so students run code without environment or package headaches.

Works well for: Faculty · Department chairs · Deans · Curriculum committees

One-on-one or small group consultation

Flexible

Direct support for a specific challenge — data management planning, grant prep, HydroShare setup, or data publishing. Can be paired with any seminar visit.

Works well for: PIs and lab groups · Remote · Grant preparation

RECENT CAMPUS VISITS

Hamilton College

HydroShare workshop — Dr. Heather Kropp course

University of Florida

Water data services — Water Institute Showcase

University of Iowa

CUAHSI vision seminar — Iowa Flood Center

Iowa State University

CUAHSI seminar — Water Resilience Collaborative

University of Nebraska

Department presentation

WHO WE WANT TO REACH

Prospective member institutions

Departments working in water science not yet in CUAHSI membership.

New member institutions

Recently joined members whose researchers may not know what is available.

Primarily undergraduate institutions

PUIs where CUAHSI tools can have outsized research impact.

Professional society partners

AGU, AWRA, ASCE, ESIP, and ecological science conferences.

Request a visit

Email us with your institution, audience, preferred format, and dates. We respond within one week.
